HHB SERIES - Long lifetime and efficient gas heaters

The HHB gas/propane direct fired heater is an innovative and effective solution designed to heat livestock buildings. More than 40 years of experience and knowledge have resulted in designing a durable and highly efficient air heater. We know that it is really important to you as a Producer that heaters perform well, and are available at a competitive price.

Product benefits

- 100% efficient - hot air is blown into a livestock building.
- Optimized airflow with a maximum length of 40 meters, due to proper position of the fan.
- Diverse safeguards ensuring full safety operation:
 - Air flow switch controls operation of fan
 - Ionization probe controls safe combustion
 - Maximum thermostat prevents against overheating of the housing

- Very easy internal cleaning due to easy-open inspection cover.
- Heater (IP65) resists thorough intensive cleaning with compressed air or pressure washer.
- High quality materials guarantee longevity, despite intensive cleaning.
- Heater provides components of well known brands which are easy to get locally and to change.
- Clear LED lighting as fault and status indication of the heater.
- Very quiet due to optimised design of the heater.
- Control possible by means of a climate control computer.
